Email: krish.kumar4140@gmail.com

Github: <https://github.com/Krishh14-ui>

Mobile: +91 9113120784

SKILLS

Languages:	C++, Python, C, Java
Tools/Platforms:	MongoDB, React.js, Node.js, Express.js, SQL Server, Git, Git hub, Postman
Soft Skills:	Problem-Solving, Team Player, Adaptability

PROJECTS

Tic-Tac-Toe with AI opponent | *Python, Minimax Algorithm* Jul' 26

- Engineered a Tic-Tac-Toe game for CSE343 featuring an unbeatable AI opponent using the Minimax algorithm with alpha-beta pruning.
- Designed the game logic and win-condition checks, and presented the algorithmic complexity analysis to the class.
- Structured the application into 9 modular, single-purpose functions and validated the opponent's optimal play through repeated test games, achieving zero losses for the computer.

HostelEats - Food Management System | *HTML, CSS, Node.js, Express.js, MongoDB, JWT* Apr' 26

- Developed a robust hotel management system using Java, enabling efficient and digitalized management of hotel resources, reducing manual workload by 40%.
- Transformed management interface to allow effortless coordination of rooms, employees, drivers, and customers; boosted operational efficiency by 50% with a more compliant and user-friendly system.
- Integrated MySQL database with the application for data storage and retrieval, ensuring data integrity and reducing retrieval time by 30%.

Memory Management Visualizer | *HTML5, CSS3, JavaScript* Mar' 26

- Developed an interactive browser-based memory management simulator covering Paging, Segmentation, and Virtual Memory concepts.
- Implemented FIFO, LRU, and Optimal page replacement algorithms with animated frame states, page fault/hit tracking, and performance statistics.
- Built logical-to-physical address translation with bounds checking, segmentation fault detection, and virtual address translation with page-fault handling.

TRAINING

CSE343 Summer Training Program - Data Structure and Algorithm(C++) Jun' 26 – Aug' 26

- Strengthened core DSA fundamentals through a college-run summer training program in C++, covering arrays, linked lists, stacks, queues, trees, graphs, and hashing.
- Implemented core algorithms (sorting, searching, recursion/backtracking, dynamic programming) in C++, analyzing time and space complexity trade-offs.
- Delivered a Tic-Tac-Toe game with an AI opponent (Minimax with alpha-beta pruning) as the program's capstone project — see Projects section.

CERTIFICATES

Basic of Data Structure Lovely Professional University	Jul' 26
Programming using C++ Infosys SpringBoard	Aug' 25
Basic Python Skillera	Jan' 25

EDUCATION

Lovely Professional University Bachelor of Technology Computer Science and Engineering; CGPA: 6.76	Phagwara, Punjab Aug' 24 – Present
Jindal Vidya Mandir Intermediate PCM: Percentage: 61%	Vidyanagar, Karnataka Jun' 23 – Apr' 24
Jindal Adarsh Vidyalaya Matriculation Percentage: 73%	Torangallu, Karnataka Jun' 21 – Mar' 22
